ABOUT PAX

PAX was founded in 1998 to bring new and effective solutions to the problem of gun violence in America—a public health crisis that claims the lives of 8 children every day. PAX has since grown into the largest non-lobbying gun violence prevention organization in the nation. More importantly, PAX's work provides parents, children and others everywhere with simple solutions to make their homes, families and communities safer—solutions that are literally saving children's lives every day.
